Application of Adult Learning Theory. 1. Adults have a need to know why they should learn something. Adults spend a considerable amount of time and energy exploring what the benefits are of them learning something and the costs of them not learning something before they are willing to invest time in learning it.

Applications of Machine Learning in Cyber Security. This study covers phishing detection, network intrusion detection, testing security properties of protocols, authentication with keystroke dynamics, cryptography, human interaction proofs, spam detection in social network, smart meter energy consumption profiling, and issues in security of machine learning techniques itself.

application of e-learning in different industries. 5 What is e-learning? When it comes to education, the model has been pretty straight forward - up until the early '00s education was in a classroom of students with a teacher who led the process. Physical presence was a no-brainer, and any

However, in many cases active learning can be employed. Here, the learner can actively choose the training data. It is hoped that allowing the learner this extra flexibility will reduce the learner's need for large quantities of labeled data. Pool-based active learning was introduced by Lewis and Gale(1994).

No single approach will perform well in all possible applications. Without understanding all of the cogs inside the box, or the interaction between those cogs, it is impossible to select the best box. Hence, we have attempted to carefully describe the model, intuition, assumptions, and trade-offs behind each of the methods that we consider.

8 Inspirational Applications of Deep Learning. Getting started in deep learning does not have to mean go and study the equations for the next 2-3 years, it could mean download Keras and start running your first model in 5 minutes flat. Start applied deep learning. Build things. Get excited and turn it into code and systems.
