Quiz & Worksheet - The Big Bang Theory | Study.com

The Big Bang is the most widely understood and accepted theory of the beginning of the universe. Even though it sounds like it was a big explosion, the Big Bang actually refers to the cosmological model that the universe started at a particular point in time as a very small, very dense, very hot state.

The Big Bang Lesson Plan (grades 4-6) - Science A 2 Z

The Big Bang theory depends on two major assumptions: the universality of physical laws and the cosmological principle. The cosmological principle states that on large scales the universe is homogeneous and isotropic. These ideas were initially taken as postulates, but today there are efforts to test each of them.

The Big Bang Theory - YouTube

The Big Bang theory explains where all the hydrogen and helium in the universe came from. In the 1940s, Ralph Alpher and George Gamow calculated that the early universe was hot and dense enough to make virtually all the helium, lithium and deuterium (hydrogen with a neutron attached) present in the cosmos today; later research showed where the primordial hydrogen came from. This is known as ...
