In economics, an externality is the cost or benefit that affects a party who did not choose to incur that cost or benefit. When there is no externality, allocative efficiency is achieved; however, this rarely happens in the free market. [unreliable source?] [better source needed] Economists often urge governments to adopt policies that will "internalize" an externality, so that costs and ...

The history of numerical control (NC) began when the automation of machine tools first incorporated concepts of abstractly programmable logic, and it continues today with the ongoing evolution of computer numerical control (CNC) technology.. The first NC machines were built in the 1940s and 1950s, based on existing tools that were modified with motors that moved the controls to follow points ...

Magic Items and Detect Magic. When detect magic identifies a magic item's school of magic, this information refers to the school of the spell placed within the potion, scroll, or wand, or the prerequisite given for the item. The description of each item provides its aura strength and the school to which it belongs. If more than one spell is given as a prerequisite, use the highest-level spell.
